

MySONTIQ MOBILE APP

Anywhere, Anytime Access Includes ID Theft Protection + Mobile Cybersecurity

QUICK FACTS

Mobile Attack Control™ monitors and alerts mobile app users to a wide array of threats including rogue apps, spyware, unsecured Wi-Fi connections, and even recognizes fake or “spoof” networks.

Rapid access to identity restoration experts ready to help.

Snapshot view through intuitive dashboard for all alert notifications.

Features PIN code, Facial Recognition and Touch ID for increased identity security.

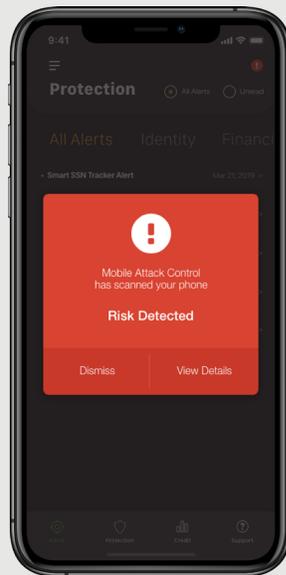

Intuitive navigation on an ad-free interface.

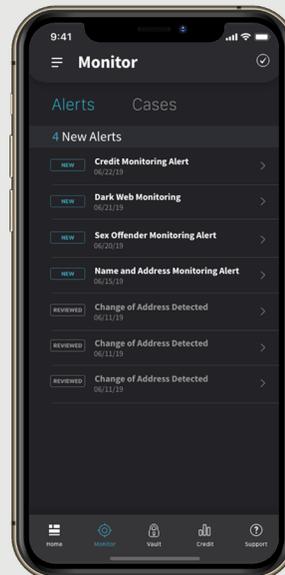

At Sontiq, we're committed, to *Protecting What Matters Most* for all people — anytime, anywhere. In today's digitalized world, your personal data is everywhere — home, work, school, doctor's office, and online. With MySontiq Mobile App, our customers can instantly access all their identity protection information with just a few taps on their smartphones, along with optional mobile cybersecurity features.

Through our brands, IdentityForce, Cyberscout, and EZShield, we're proud of our combined 80+ year legacy in providing our customers with world-class technology combined with 5-star personalized support. It's why we have a 95% customer satisfaction rating, 98% member retention, and 100% restoration success.

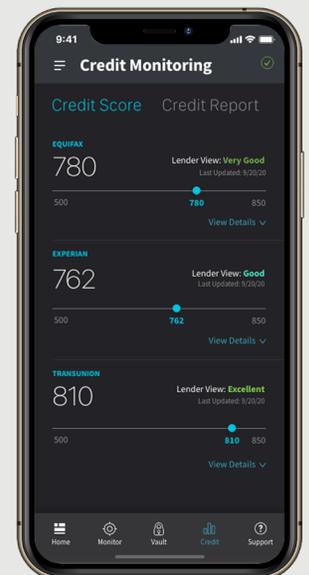

We're not just Identity Protection, we are *YOUR* Identity Protection partner.

With Mobile Attack Control's™ scan, Sontiq customers will be alerted to a wide array of mobile threats to protect against mobile hacks and threats.

Stay informed by viewing alerts and notifications instantly with one touch details.

Sontiq customers with accounts that include credit monitoring have immediate access to credit reports and scores plus tips to help understand the ratings.

WE MAKE IDENTITY PROTECTION... EASY

With MySontiq Mobile App, customers can take their Identity Theft Protection anywhere — whether they are traveling overseas, away on vacation, or just don't want to be tethered to their desktop computer.

Once the mobile app is downloaded from either the **App Store** or **Google Play**, it takes just three steps to gain full account access. It's as easy as entering your User ID and Password and then setting a PIN code.

MySontiq Mobile App supports co-branding. When customers log in they will either see one of Sontiq's product brands, or the app can be white labelled for a partner.

Upon entering Login information, Sontiq customers can activate either PIN code, facial recognition, or Touch ID depending on phone model.

SECURITY MATTERS

Our top priority is your security, and through MySontiq Mobile App we use PIN code, facial recognition, and Touch ID.

PIN Code | A Personal Identification Number (PIN) is a numerical password that is entered manually and used in authenticating a customer prior to accessing a system.

Facial Recognition | Ability to identify or verify a customer by mapping facial features, characteristics, and dimensions in order to grant access. Available based on phone model settings.

Touch ID | Faster and more secure than a 4-digit passcode, Touch ID is a fingerprint sensor and is becoming the de facto standard for proof of identity.

MONITOR

Continuous monitoring to keep credit history and personal information secure.

ALERT

Push notifications and real-time access to alerts.

PROTECT

Rapidly creates a shield of protection around your mobile device, financial accounts, credit cards, and personal information.

RECOVER

Award-winning, fully-managed recovery services.

GET STARTED!

It's easy to get started. Customers can download the free MySontiq Mobile App at either the iTunes store for iOS or the Google Play store for Android.

ABOUT SONTIQ

Sontiq is an Intelligent Identity Security company arming businesses and consumers with award-winning products built to protect what matters most. Sontiq's brands, **IdentityForce**, **Cyberscout**, and **EZShield** provide a full range of identity monitoring, restoration, and response products and services that empower customers to be less vulnerable to the financial and emotional consequences of identity theft and cybercrimes.
